Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of producing a lysosomal hydrolase having an oligosaccharide modified with N-acetylglucosamine-1-phosphate comprising culturing cells in the presence of *Pseudomonas* exotoxin A, classified in class 435, subclass 195.
- II. Claims 11-22, drawn to a method of producing a lysosomal hydrolase having an oligosaccharide or an oligosaccharide modified with N-acetylglucosamine-1-phosphate comprising introducing a polynucleotide encoding the lysosomal hydrolase into a furin deficient cell, classified in class 435, subclass 195.
- III. Claims 23-30, drawn to a method of producing a phosphodiesterase α -GlcNAcase comprising contacting a cell producing the enzyme with a mutagenic agent and then culturing the cell in the presence of *Pseudomonas* exotoxin A, classified in class 435, subclass 196.
- IV. Claims 31-41, drawn to a method of producing a phosphodiesterase α -GlcNAcase comprising expressing the enzyme in a furin deficient cell, classified in class 435, subclass 196.
- V. Claims 42-44, drawn to a method of producing a phosphodiesterase α -GlcNAcase comprising culturing a cell in the presence of *Pseudomonas* exotoxin A, classified in class 435, subclass 196.

The inventions are distinct, each from the other because:

Groups I-V are directed to methods of producing two different enzymes using 3 different processes. Because the products produced and the steps used are different, the groups are patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different

classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles L. Patterson, Jr., PhD, whose telephone number is 703-308-1834. The examiner can normally be reached on Monday - Friday, 7:30-4:00.
